A Two-Branch Model of Non-Democracy”

**American University in Beirut,
Center for Arabic and Middle East Studies** Beirut, Lebanon
Certificate in Advanced Intensive Arabic 2011

Book Project

Faith in Numbers: How Religion Promotes and Undermines Democracy

Why does religion sometimes increase support for democracy and sometimes do just the opposite? In this project, I present a theory of religion, group interest, and democracy. Focusing on communal religion, I demonstrate that the effect of communal prayer on support for democracy depends on the interests of the religious group in question. For members of groups who would benefit from democracy, communal prayer increases support for democratic institutions; for citizens whose groups would lose privileges in the event of democratic reforms, the opposite effect is present. I test these claims both observationally and experimentally using a variety of data sources, including an original nationally-representative survey in Lebanon. I find that communal religion increases the salience of sectarian identity, and therefore pushes respondents’ regime attitudes into closer alignment with the interests of their sect.

Awards and Fellowships

Aaron Wildavsky Award for Best Dissertation
in Religion and Politics, American Political Science Association 2018

Large Social Sciences Research Grant,
Institute for Scholarship in the Liberal Arts (University of Notre Dame), \$15,000 2017
